

# 04/04/2022 World Health Day

## Across

- Defined as "long, destructive fire that spreads quickly over woodland or brush." \_\_\_\_\_ can cause death and injury from suffocation.
- A period of 10 years. The last \_\_\_\_\_ was the hottest in 125,000 years.
- A method of getting from one point to another, such as driving or flying. \_\_\_\_\_ produces around 20 percent of global carbon emissions.
- Heat \_\_\_\_\_. Above 40 degrees, these might happen, causing organ failure and death.
- Another word for high temperature. Exposure to this can cause headaches.

## Down

- Defined as "an overflowing of a large body of water beyond its confines." \_\_\_\_\_ can cause poisoning.
- Defined as "frozen water." We are losing 1.2 trillion tons of \_\_\_\_\_ each year due to climate change.
- Defined as "related to the natural world and the impact of humans activity on its condition." Every year \_\_\_\_\_ factors kill an estimated 13 million people.
